THIRTY THOUSAND GALLONS OF WHISKY POURED INTO THE MOUNTAIN STREAMS

(By Associated Press)
WASHINGTON, Aug. 30.—Eight weeks' of systematic campaign by the revenue department against the ridding of moonshiners in the mountains of southern prohibition states resulted in the seizure of 488 stills, the arrest of 200, the killing of five outlaws and two sheriffs and the wounding of a number of other government men and liquor makers. Thirty thousand gallons of moonshine whisky were poured down the mountain streams. Paraphernalia seized was valued at \$100,000. Most of the 21,000 pounds of sugar seized was given the Red Cross.

Recommendations for 321 prosecution were sent to the department of justice. More than a score of deserters from the army were discovered participating in moonshine manufacture. Two of these were killed in Georgia by armed raiders. Extraordinary significance is attached to these concerted raids because Revenue Commissioner Roper undertook the enterprise to demonstrate that prohibition can be made effective. Another purpose was to eliminate sources from which moonshine can be furnished clandestinely to soldiers in southern training camps.
